

## HUSQVARNA A 1000 AIR SCRUBBER

20Kg, 40cm × 44cm × 44cm

This is a high performing HEPA-rated air scrubber very suitable for high capacity and sensitive work. Our team have particle tested these units and they are proven to be very efficient. They are certified for use as a negative air unit as well as an air cleaner.

### TYPICAL USES:

- Mould and Indoor Air Cleanup- Remove dangerous mould and VOC's from the air in contaminated spaces and are a vital component of decontamination.
- Restoration and Construction- Used to filter out floating particles and dust, necessary for most remediation works under IICRC guidelines.
- Allergy, Dust and Soot Control- HEPA Air Scrubbers are perfect for helping make the air safer after fires; and can reduce allergy and dust reactions by removing particles from the air.
- Clean Rooms and Server rooms- Used to keep floating particles to a minimum and ensure airborne contaminants are captured safely without compromising room cleanliness.

### Specifications

Power Supply (V /hz)	230/50
Current Consumption (Amps)	2
Air Flow (m3/hr)	1000
Fan Speed Settings	2
