

MOISTURE METER HIRE

300g, 17.4cm H × 6.3cm W × 35cm D

Trotec 510 Moisture Meter

The Trotec 510 Moisture Meter is a dependable tool when investigating moisture issues within a property. The tool is perfect for building and carpet inspections due to its handheld nature and simple interface.

TYPICAL USES:

- **Water damage**
Great for determining the amount of moisture in a given material. Perfect to use while completing a water damage dry-down. Use this tool to verify what is dry and what is still wet
- **Mould investigations**
Mould is often caused by a residual moisture issue that needs fixing. Find the moisture, find the source of the mould
- **Water leak source investigations**
At times it's not always obvious where the leak is coming from. By using a moisture meter, you will greatly increase your chances of locating that leak
- **Psychrometric Reading**
Use this meter to get relative humidity and temperature readings, and calculate your GPK and dew point readings
