

ZEFON BIO-PUMP® PLUS

0.68kg, 6.9cm H x 11.4cm W x 20.3cm D

The Zefon Bio-pump is a light, battery-powered solution to indoor air quality testing. With the hire of this pump, you will need to purchase Air-O-cell samples to complete the testing.

TYPICAL USES:

- Air Quality Investigations- Identify and understand mould and contaminants in the air.
- Health Concerns- Isolate and confirm health concerns regarding indoor air quality.
- Restoration Work- Used as part of water damage restoration work to ensure the quality of work.
- Post-Remediation Verification- Audit and provide quality assurance after remediation.
